Work in a group of 3–4 students. Using your shared IT project, evaluate the following SDLC models:

(1) Waterfall
(2) Iterative
(3) Agile SDLC

For each model:
Decide whether the model would work for your project (Yes/No).
Explain why or why not.
Consider the project size, risk level, and requirement stability.
Output: SDLC Model Matching Table.

ATHLIX – Booking Lapangan Olahraga

SDLC Model	Would it work?	Why / Why not?	Project Size	Risk Level	Requirement Stability
Waterfall	No	Waterfall kurang fleksibel jika terdapat perubahan kebutuhan selama proses pengembangan. ATHLIX masih membutuhkan feedback dan perubahan desain.	Medium	Medium	Low
Iterative	Yes	Model Iterative memungkinkan sistem dikembangkan secara bertahap dan diperbaiki pada setiap iterasi berdasarkan hasil evaluasi.	Medium	Medium	Medium
Agile SDLC	Yes	Agile cocok karena tim dapat bekerja dalam beberapa iterasi, menerima feedback pengguna, dan menyesuaikan fitur maupun desain ATHLIX selama proyek berjalan.	Medium	Medium	Low
