User Story

As a student, I want to select my service purpose and get a queue number digitally, so that I can see my queue position and estimated waiting time without having to wait in a long physical line, while keeping the queue organized and preventing other students from cutting in line.

Acceptance Criterion

The requirement is complete when students can select their service purpose, receive a queue number digitally, view their queue position and estimated waiting time, and have their queue number recorded in the system so that the queue order remains organized and cannot be cut by other students.
